I hereby give consent for my personal data to be processed for the purpose of this and future recruitment processes.

SUMMARY

Systems Engineer with over 3 years of professional experience. Currently managing systems and infrastructure for 60+ sites across 7 countries. Serving as the primary escalation point for 9 local IT departments. Maintaining virtualized environments of Windows/Linux servers and a hybrid domain ecosystem.

WORK EXPERIENCE

Systems Administrator for Central, South & Eastern Europe **October 2025 - Present**

Antalis

- Operating a large-scale hybrid domain Microsoft 365 ecosystem for 1,000+ users. Managing IAM via EntraID, Intune device compliance, deployment and configuration and Exchange Online mail server along with on-premises Active Directory environment.
- Resolving legacy documentation debt by migrating decentralized records into a version-controlled "Docs as Code" framework.
- Standardized IT operations by rebuilding service desk system (EasyVista ITSM) and rolling out newly created procedures across the organization that reduced ticket MTTR.
- Deployed Grafana as a central monitoring hub. Built technical and business dashboards by integrating data from EasyVista, Zabbix, system logs and applications for real-time ticket and system tracking.

IT Administrator **July 2024 - October 2025**

Outpro

- Deployed Microsoft 365 solutions integrating local domains via Azure AD Connect, migrating hundreds of mailboxes, configuring Identity and Access Management based on prepared security policies along with endpoint deployment through Intune.
- Automated the deployment of 100 endpoints for a medical client using Windows Deployment Services (WDS), custom GPOs, and scripting.
- Administered Windows Server and Linux environments, deployed local domain controllers, Veeam backups, and Synology/QNAP NAS systems.

Junior IT Administrator **June 2023 - July 2024**

West Pomeranian Business School

- Automated endpoint setups using WDS and preconfigured VM images. Reorganized AD OUs and deployed GPOs for automated software installation and device configuration.
- Implemented SnipeIT to centralize asset management, using Python scripts to migrate data from Excel and subsequently registering 300+ new hardware assets and licenses.
- Analyzed recurring helpdesk tickets to write standard operating procedures and build an internal knowledge base, which measurably dropped weekly ticket volumes.

EDUCATION

Bachelor of Engineering
WSB Merito University
Computer Science
October 2024 - Present

Bachelor in Management
West Pomeranian Business School
International Business Studies
October 2021 - June 2024

SKILLS

- Windows and Linux (Ubuntu/Debian) Servers
- Active Directory Domain & Federation Services
