WOJCIECH CIEŚLAK

IT Systems Engineer

wcieslak99@proton.me | +48-794-792-636 | LinkedIn | Warsaw, Poland

I hereby give consent for my personal data to be processed for the purpose of this and future recruitment processes.

SUMMARY

System Engineer with 3 years of experience. Currently managing systems and infrastructure for 60+ sites across 7 countries (900+ users). Serving as the primary escalation point for 9 local IT departments. Maintaining virtualized environment of Windows/Linux server ecosystems and a large scale, multi-vendor network infrastructure.

WORK EXPERIENCE

Systems Administrator for Central, South & Eastern Europe **October 2025 - Present**

Antalis

- Standardized IT operations by rebuilding service desk system (EasyVista ITSM) and rolling out a new operating framework across the organization that reduced ticket MTTR.
- Deployed Grafana region-wide as a central monitoring hub. Built technical and business dashboards by integrating data from EasyVista, Zabbix, system logs and applications for real-time ticket and system tracking.
- Fixed the existing Zabbix environment by repairing broken templates and triggers, eliminating false alarms to restore reliable monitoring.
- Resolving legacy documentation debt by migrating decentralized records into a version-controlled "Docs as Code" framework.

IT Administrator **July 2024 - October 2025**

Outpro

- Implemented Microsoft 365 and Exchange Online, integrating local domains via Azure AD Connect and migrating hundreds of mailboxes.
- Automated the deployment of 100 endpoints for a medical client using Windows Deployment Services (WDS), custom GPOs, and scripting.
- Designed and deployed high-availability LAN/WLAN infrastructure for a high-bay logistics warehouse; managed full-stack Fortinet deployment (FortiGate, FortiSwitch, over 30 FortiAPs) including L2/L3 segmentation and RF coverage optimization.

Junior IT Administrator **June 2023 - July 2024**

West Pomeranian Business School

- Automated endpoint setups using WDS and preconfigured VM images. Reorganized AD OUs and deployed GPOs for automated software installation and device configuration.
- Implemented SnipeIT to centralize asset management, using Python scripts to migrate data from Excel and subsequently registering 300+ new hardware assets and licenses.
- Analyzed recurring helpdesk tickets to write standard operating procedures and build an internal knowledge base, which measurably dropped weekly ticket volumes.

EDUCATION

Bachelor of Engineering
WSB Merito University
Computer Science
October 2024 - Present

Bachelor in Management
West Pomeranian Business School
International Business Studies
October 2021 - June 2024
